## PROFILE

Dynamic and detail-oriented Computer Science and Engineering graduate with a strong foundation in software development and a passion for building robust and scalable web applications. Proficient in full-stack development using the MERN (MongoDB, Express.js, React.js, Node.js) technology stack.

## PROJECTS

### Full-stack Foody App

[GITHUB](#)

- **Description:** Developed a comprehensive food delivery application using the MERN stack (MongoDB, Express.js, React.js, Node.js) that surpasses popular platforms like Zomato and Uber Eats in terms of user experience, delivery speed, and overall efficiency.
- **Key Features:**
- **User Interface:** Designed an intuitive and responsive frontend using React.js, ensuring a seamless experience across devices.
- **Order Management:** Implemented a robust backend with Node.js and Express.js to handle order processing, real-time updates, and user authentication.
- **Database:** Utilized MongoDB for efficient data storage and retrieval, ensuring scalability and high performance.
- **Payment Integration:** Integrated secure payment gateways to facilitate smooth transactions and enhance user trust.
- **Deployment:** Deployed the application on a cloud platform, ensuring reliability and accessibility for users.
- **Impact:** The app achieved faster delivery times and higher user satisfaction compared to existing market leaders, demonstrating the effectiveness of the optimized processes and user-centric design.
